

To our Upper School students and parents,

We hope your summer is off to a great start! As you look forward to the break, we want to take a moment to direct your attention to the Summer Math Packets that are available on the Habersham website.

Each math packet includes a list of topics, examples, practice problems and online resources to help you prepare for success in math class in the upcoming school year. These packets essentially answer the questions:

How can I set myself up for success in math class in the upcoming school year?

What does my math teacher expect me to know already?

How can I avoid feeling lost in class?

While these packets are optional, we strongly recommend working on one topic a week this summer to make sure you are prepared for success in math class next year.

We hope that these packets serve as useful resources to help you feel confident about starting math class well in the fall. Until then, have a great summer!
